Rick

Skills:

- Fifteen years manufacturing planning, forecasting, and inventory management experience
- Ten years functional Oracle ERP implementation experience
- Oracle 11i, 11, and 10.7 experience.
- Specialize in Oracle BOM, CST, EAM, ENG, INV, PO, MRP, MSCA, & WIP modules.
- Ten full life cycle implementations
- Team leadership experience
- Process control, application setup, interfaces, custom reporting, testing, debugging, user training, data conversion, and post implementation support
- Basic SQL queries

Work Experience:

BCI

Owner (Independent)

Mar 2008 – Present

Projects:

Barrick Gold (11.5.10.2)

- Supply Chain Support (PO, iProcurement, INV, EAM)
- iProcurement Punchout Implementation
- iSupplier Portal Implementation
- MSCA GUI Implementation
- UPK Test Script Development and End User Training
- R12 upgrade preparation

CSC

Senior Principle

Jan 2008 – Mar 2008

Projects:

Brooks Automation (11.5.10.2)

- Supply Chain Track (Cost, INV, BOM, WIP)

- Instance Setup, documentation, and debugging
- Custom report functional design and validation
- Data Load and reconciliation
- UPK Test Script Development and Training Materials
- User Training

Bearing Point

May 2005 – Jan 2008

Manager

Projects:

USG (11.5.9)

- Cost Track
- Instance Setup, documentation, and debugging
- Custom report functional design and validation
- Data Load and reconciliation
- Go-live Support and Issue Resolution

IT Convergence

May 2004 – May 2005

Senior Principle Consultant

Projects:

KCI (11.5.8)

- Creation of new Inventory Organization
- Setup, processes, training, data, for the Inventory, BOM, WIP, Cost, and Engineering modules.
- Support go-live of Mobile Supply Chain
- Data cleanup initiative: Purchase orders, Bills of Material, Routings, and Items.
- Restructuring of job functions and Oracle Responsibilities for Sarbanes-Oxley compliance.
- Oracle post implementation support for manufacturing functions

B C I Inc.

Dec 1999 – May 2004

Independent Contractor

Projects:

Deseret Book (11.5.9)

- Oracle post implementation support
- Oracle Advanced Pricing, Order Management, Inventory
- Developed advance pricing qualifiers and modifiers, included conflicting promotions and discounts
- End user training and data cleanup

CSI (11.5.9)

- Oracle upgrade 11.03 – 11.5.9
- Oracle BOM, Cost, Inventory, Order Management, MRP and WIP
- Application setup, testing, debugging
- Data Mapping, cleansing, purging
- Inventory interface design (functional perspective)
- Production Support

Empi (11.5.7)

- Oracle BOM, Cost (Average & Standard), Inventory, and WIP lead
- Future State / Solution Design development
- Application setup, testing, debugging
- End user training
- Inventory interface design (functional perspective)
- Custom reporting specification design

Progress Casting Group (11.5.6)

- Oracle Engineering Phase II implementation lead
- Current state discovery and future state process flow development
- Application setup, testing, and debugging (including workflow)
- Phase I post implementation support for BOM, Inventory, MRP, WIP, and System Administration

JDS Uniphase (11.0)

- Oracle BOM, Engineering, Inventory and WIP module lead
- Current state discovery and future state process flow development
- Application setup, testing, and debugging
- ATO/PTO setup and implementation
- Custom report design and specification documentation
- Mapping and validation of legacy system data conversion, SQL queries

Zoza.com (11.0)

- Oracle BOM, Cost (Average), WIP module lead. Assisted with the Inventory and Purchasing modules
- Current state, future state, setup, testing, user training, documentation, and knowledge transfer

PaperPak Co. (11.0)

- Established NPI process and system configuration. Included ECO approval workflow for item, BOM and routing creation
- Oracle post implementation client support in a multi-national standard cost, discrete manufacturing environment
- Launched item cost restructure initiative: included cost type, material, overhead, resource and rate analysis

Ernst & Young, LLP

Dec 1998 - Dec 1999

Senior Consultant, Management Consulting Division

Projects: Paper Pak Co. & Applied Materials (11.0)

- Team Lead on a twelve month international Oracle ERP implementation for Oracle WIP, BOM, and Engineering modules for 4 sites in two countries
- Conducted current and future state analysis, system configuration
- Assisted in testing and implementation of the Cost and Quality modules
- Responsible for TAR and issue resolution for the above stated modules
- Designed and a customized ECO workflow process which included multiple approval lists and voting options
- Led a BOM cleanup initiative and routing creation project in conjunction with the Plant Controller

Franklin Covey Co.

Feb 1993 - Dec 1998

Manager, Master Production Scheduling

- End user implementation of Oracle operating system
- Managed all production scheduling for \$600 million firm
- Implemented Oracle MDS, MPS, and MRP
- Managed capacity via RCCP and Capacity Requirements Plan

Master Production Scheduler

- Create and publish Master Production Schedule for all paper products
- Generate purchase requisitions and work orders
- Forecast all raw and finished category products

Education:

Master of Business Administration

June 1998

University of Utah

Bachelor of Science

December 1991

Weber State University

Major: Finance
